#DeepTechTribe

Create your IP with the AI and DeepTech experts

Enterprises worldwide want to adopt AI to create models that suit and make them efficient.
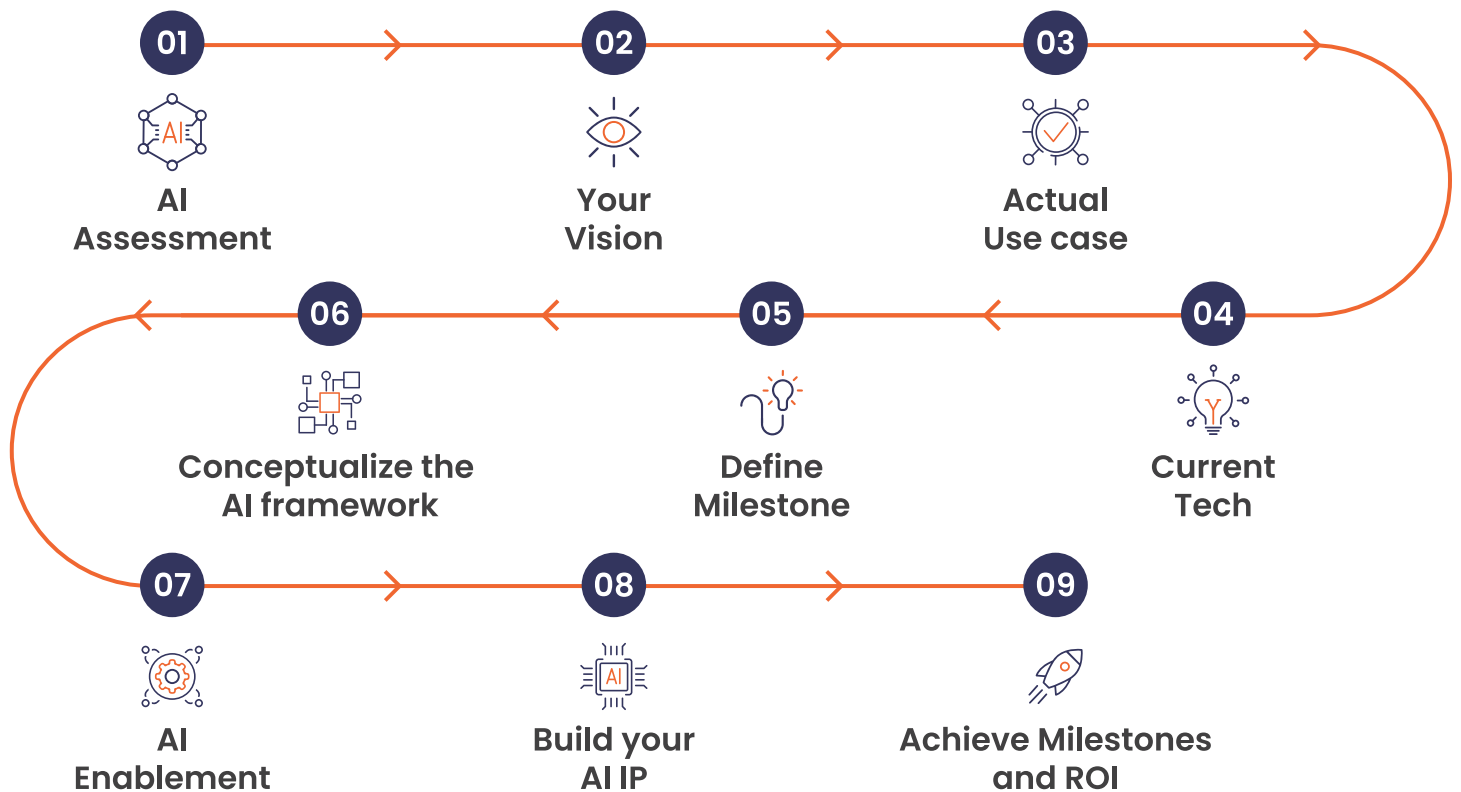

Everyone wants their own ChatGPT or Gemini. However, there are apprehensions due to the lack of a secure environment, long research cycles, vendor lock-ins, and the absence of IP (Intellectual Property) development.

This is where Bankai Labs comes in.

Bankai Lab is a cutting-edge deep-tech lab specializing in R&D, AI consultancy, and developing new-age tech products.

> **We help enterprises and CSPs identify and create their AI and Deeptech IP/ Solutions**

Our Approach

01 — AI Assessment

02 — Your Vision

03 — Actual Use case

04 — Current Tech

05 — Define Milestone

06 — Conceptualize the AI framework

07 — AI Enablement

08 — Build your AI IP

09 — Achieve Milestones and ROI

BL

50+ Use Cases

100+ Customers

2 Patents

Build your AI model with 10,20,30 framework

10 Hours
Workshop

20 Days
POC

30 Weeks
Product Launch

* For a well-defined scope.

Stay ahead of your competitors

Combat Fraud
AI employs machine learning algorithms to analyze vast amounts of data, detecting patterns indicative of suspicious activities such as IRSF, Flash calls, Robocalls, Wangiri scams, Subscription fraud, Fake traffic, and others.

Smart & Personalized Customer Service
Build intuitive interactions with a chatbot that has a personal touch. Resolve issues faster and create opportunities for cross-selling and upselling.

Sustainable Energy Management
Select energy-efficient paths and optimize network configurations to reduce the Telecom carbon footprint.
Efficient Network Management
AI-driven network management, predictive analytics for congestion and failures, proactive maintenance, and real-time traffic optimization.

Metadata-driven Intelligence
AI algorithms can analyze metadata to identify patterns, trends, and correlations for strategic decisions, customer retention, and new opportunities.

Say hello to CogniGenX

A self-service ML and DeepTech suite design for faster go-to-market.

Simplicity and Adaptability

CogniGenX simplifies the adoption of ML across industries, addressing diverse challenges through its flexible and customizable nature.

Strategic growth potential

Its scalable microservices architecture fosters continuous innovation and expansion, unlocking new revenue streams and opportunities to serve a broader clientele.

Cost Effective and Efficient

By streamlining ML development and deployment, CogniGenX empowers organizations to harness the power of AI without significant upfront investments or extensive technical expertise.

The Trailblazers

Priyanka Brahmbhatt
Founder and CEO

3x Founder
Author: The Integrated Marketing Handbook
MBA: Cornell
UN Youth Delegate
Startup Mentor

Sridhar Seshadri
Co-founder and CTO

3x Founder
Author: UnCOMMON MAN's Artificial Intelligence
Prev: Meta, EA Sports
BITS & UT Austin Alumni
Startup Mentor Stanford

Shreeram Iyer
Chief Growth Officer

2x Founder
